

LUBRO CONTROL UNITS

**Lubro Control Unit, part numbers 16074 and 60339**

Norbar's standard filter, regulator, lubricator unit 16074 and 60339 feature a 100 mm diameter gauge for easy and accurate setting of air pressure with ergonomic placement of air pressure adjustment control. Supplied with 3 metres of robust, steel braided air hose with fittings to connect to PneuTorque® wrenches.

**Twin Regulator Lubro Control Unit, part number 16075**

The 'Twin Lubro' has the same features as Norbar's standard filter, regulator, lubricator unit but has the benefit of two regulators and a switch that allows quick selection between two air pressure settings. A typical application for this would be a PneuTorque® user wishing to quickly select between two applications requiring different torque settings. For example, this might be controlled torque in the forward direction and maximum torque allowed by the tool in the reverse direction.

**Multi Channel Lubro, part number 60290**

The Multi Channel Lubro is for users who wish to run their pneumatic tools at multiple air pressure settings, without having to make time consuming adjustments to an air regulator. The Multi Channel Lubro can be programmed for up to 15 air pressure settings and these settings can be locked by the removal of the programming key. A typical application would be a tyre shop servicing various vehicles, each vehicle having a different wheel nut torque. Settings can be recorded on a write-on label situated on the front of the Lubro Control. The Multi Channel Lubro is battery powered with a battery life of approximately 16 hours under normal use.

SOCKET RETAINERS

These socket retaining clips make attaching sockets to square drives easy and quick.

8	SOCKET RETAINING CLIPS
19556	Socket Retaining Clip for 3/4" sq. dr. (Yellow) - Pack of 10
19557	Socket Retaining Clip for 1" sq. dr. (Red) - Pack of 10
19558	Socket Retaining Clip for 1 1/2" sq. dr. (Green) - Pack of 10
19559	Socket Retaining Clip for 2 1/2" sq. dr. (Blue) - Pack of 10

This product is intended for general purpose use at ground level. It is not intended as a solution for socket retention when working at height or where FOD (foreign object damage) could cause a safety and/or commercial risk.

Not recommended for use with impact tools.
