## RLT-Series, Low-Height Telescopic Cylinders ENERPAC

RLT-Series, Low-Height Telescopic Cylinder

- Single-acting, load-return
- Nitrocarburized surface treatment inside and out provides corrosion protection
- For use in confined spaces: machinery positioning, tool fastening
- Mounting bolt holes for easy fixing
- Up to 3% side-load of maximum capacity
- Design safety factor complies with ASME B30.1 & EN1494
- CR400 coupler for compatibility with standard product
- High-Alloy steel for maximum strength.

# For longer cylinder strokes in confined spaces

### RLT-Series, Low-Height Telescopic Cylinders

Enerpac compact, low-height telescopic cylinders are available with two or three pistons, and can lift loads up to 40 mm in a single movement.

Nitrocarburization surface treatment for improved wear resistance and corrosion protection for increased safety and longer service life in harsh conditions.. The longer stroke length of telescopic cylinders will save you time and simplify projects by moving a load a greater distance and eliminating the use of temporary cribbing.

#### **Multi-Stage Cylinders**

**1st Stage**: maximum load capacity at lower stroke.

**2nd Stage**: extended stroke with lower capacity than the 1st stage.

Final Stage: maximum stroke extension with lowest capacity.

## Low-Height Telescopic Cylinders, Single-Acting

Assisted-return Pumps with Venturi Valve Technology

To improve productivity and plunger retraction, Enerpac offers valve configurations designed to accelerate your cylinder

retraction speeds, ZU4 and ZE-Series pumps feature **Venturi Valve Technology** to facilitate the faster return of single-acting load and spring-return cylinders. See enerpac.com for details.

4-wa com Offer and

4-way Manifold assembly complete with gauges

Offering ease of portability and convenience with an ergonomic robust design,

ready for use. Enerpac's CR400 female couplers on all ports allow the manifold to be quickly connected to up to 4 cylinders. Glycerine filled, 700 bar gauges allow operators to work safely. All protected by the robust protection frame.

| Manifold Type<br>(Used for cylinders) | Model<br>Number |
|---------------------------------------|-----------------|
| 4x Single-acting                      | AMGC41          |
| 4x Double-acting                      | AMGC42          |

### **RLT** Series

Capacity: 4,4 - 74,1 ton Stroke:

17 - 40 mm Maximum Operating Pressure:

700 bar

### WARNING:

If several telescopic cylinders need to be controlled simultaneously Enerpac recommend the use of EVO-Series

Synchronous Lifting Pumps. Enerpac advise not to use SFP-Series Split-Flow pumps to operate several telescopic cylinders at a time due to the volume difference on the different stages.
